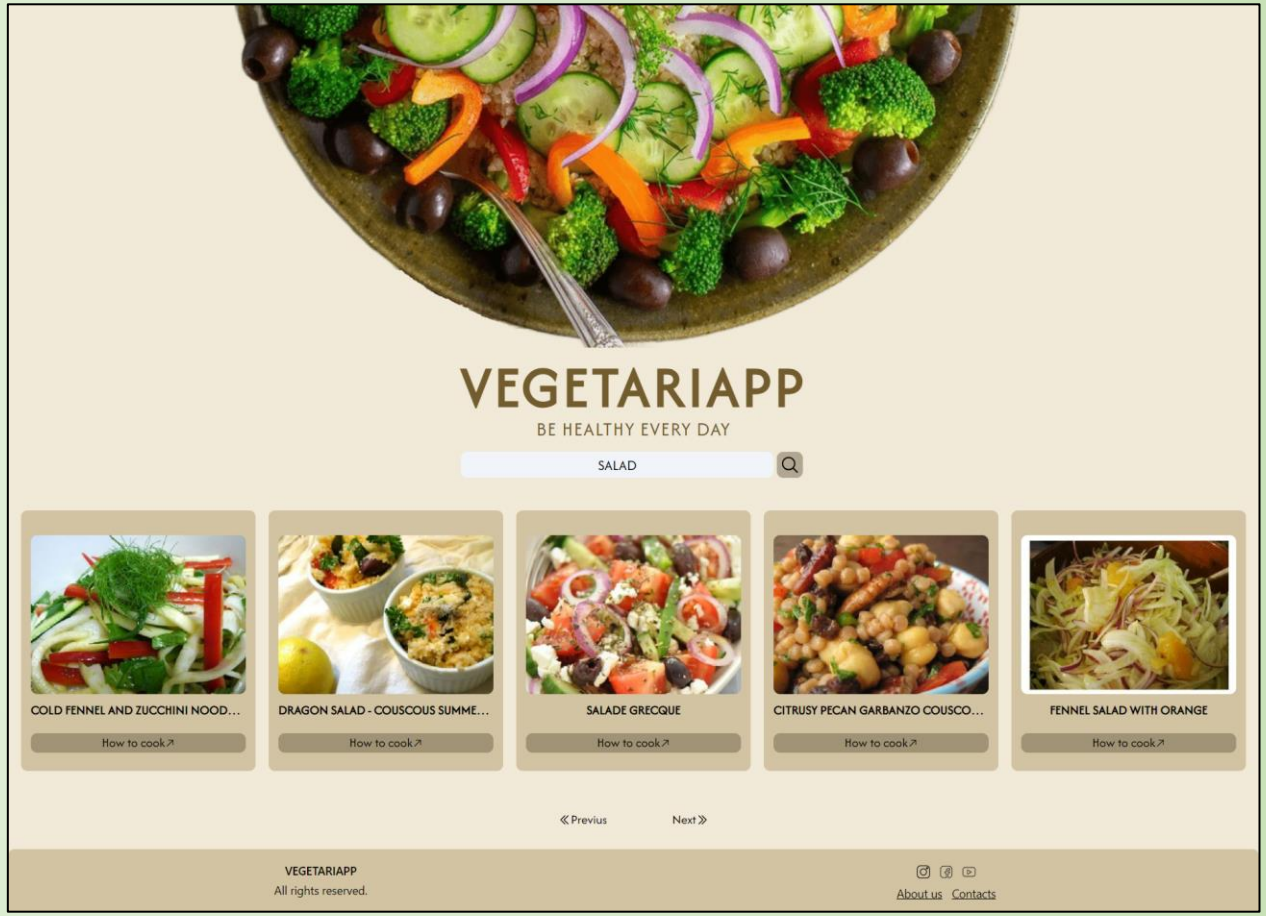
STRUCTURE

This is a **single-page application** that allows you to search exclusively for vegetarian recipes using a **search bar** and displaying the results below.

It shows **5 recipes** per time on a row, with their name and a button ‘How to cook’.

You navigate between recipes on the pages via **2 buttons** at the bottom.



MEDIA QUERIES

The app is totally **responsive**.

The **breakpoint** between mobile and desktop is set with ‘md’ Tailwind’s class at 768px.

5 recipes per time are shown on a column.

TOOLS

Tools that I used:

1. to build the app
2. to menage API call
3. to create the logic of single-page app

Vite

AXIOS

REACT ROUTER
